Java OCA/OCF 8 Programmer Practice Tests

In late 2016, Scott Selikoff and Jeanne Boyarsky were approached by **Wiley Publishing** to create a brand new book of practice exam questions for the Oracle Certified Associate (OCA) and Oracle Certified Professional (OCP), Java SE 8 Programmer, exams. The new book, **OCA / OCP Java SE 8 Programmer Practice Tests**, serves as a worthwhile addition to our existing OCA 8 and OCP 8 book lineup, for those who have read the material thoroughly, but desire additional help practicing for the exams.

The book is divided into two parts, one half for the OCA 8 exam and the other half for the OCP 8 exam, with each chapter corresponding to a different set of Oracle objectives. The new book includes over 1,000+ hand-crafted and peer reviewed practice questions, including two full mock exams. With our two Study Guides and or

Errata

The table is sortable so you can see focus on the errata by criticality, chapter or see the ones added since you last checked. To report a potential error, please create a thread at <http://www.coderanch.com/forums/f-24/java-programmer-SCJP>. Note that we've removed online only errata (conversion errors) from this table after they were fixed. Errata in the book will remain posted of course!
